EXPERIENCE

TEAM FURRIER | BACK-END WEB DEVELOPER

Jan 2022 - Present | Ahmedabad, India

This is a startup working on the welfare and adoption of pets and requires a user-friendly, functional website for the same. My duties are to add the functions to this website and make it dynamic. I will be using NodeJS and ExpressJS for the same.

YOUNG INDIA NPO | BACK-END WEB DEVELOPER

Jan 2022 - Present | Ahmedabad, India

This startup is working for the young generation of India and as its back-end developer, I am working on making its website functional, dynamic and easy to use.

SHAPEAI | FULL STACK DEVELOPMENT INTERN

Jun 2021 - Oct 2021 | Remote

Learned front-end and back-end web development using React, Node, Express, etc. and preparing data structures and algorithms simultaneously, and made projects along the way.

THE SPARKS FOUNDATION | WEB DEVELOPMENT INTERN

Jun 2021 - Aug 2021 | Remote

Completed one of the web development tasks, integrating payment gateway to my temporary portfolio website and improving LinkedIn profile by following certain tips and standards.

VERZEO | ARTIFICIAL INTELLIGENCE INTERN

Apr 2021 - May 2021 | Remote

Trained for the concepts of the internship and built a couple of AI models using neural network as a part of the internship.

PROJECTS

👤 FACE MASK DETECTION MODEL | SEMESTER 5 PROJECT

Detection of face mask on a person's face using neural network and webcam image capturing and processing. The objective of the project is to provide basic version of a possible full-fledged software to detect face-masks using CCTV in public places.

🚦 TRAFFIC SIGN DETECTION MODEL | VERZEO INTERNSHIP PROJECT

Detection of traffic sign from images using neural network and image processing. This model can be used to develop a software for smart cars.

🫀 HEART DISEASE PREDICTION MODEL | VERZEO INTERNSHIP PROJECT

Supervised learning model using data analysis of a csv file from Kaggle, and predicting chances of occurrence of heart disease in a person.

🌪️ DISASTER CLASSIFICATION ANALYSIS | RESEARCH PROJECT

Classification of images into type of the disaster occurred using CUDA and CudNN for maximum accuracy of classification.
